ABOUT US

Orwell Healthcare is one of Ireland’s most respected healthcare providers, with an unrivalled reputation for the care and consideration we demonstrate every day to our clients. We are a family-run business, founded in 1988, headed by Peter and Dr Mary Jones who have used their extensive experience in healthcare to develop Orwell Private, Orwell Home Care and Orwell Education as centres of excellence for the provision of care. Each of these services operates under the universal ethos of empowerment and respect towards the individual, with a focus on maximising independent living where possible.

OUR VISION

Our vision is to provide a continuum of exceptional care in a friendly, homely but luxurious environment. This continuum is made up of residential long and short-term care for a wide variety of conditions, along with a friendly and supportive home care service for our more independent and self-reliant clients. Both services are supported by our in-house education and training centre, Orwell Education.
ORWELL PRIVATE

At Orwell Private, the residential division of Orwell Healthcare, located in the heart of Dublin 6, we set the standard for compassionate and professional nursing care, catering for long-term residence, respite care, convalescence, dementia care, acquired brain injury care, rehabilitation and palliative care.

Orwell Private consists of three separate but connected buildings. Orwell House is a period house built in the 1830s with a 3-story extension both of which have undergone a complete refurbishment.

The Elgin, which opened in April 2015, stands beautifully over four floors with balcony views and bright, airy rooms. The Elgin is home to both long-term residents and our luxurious 13 bed Convalescent Unit.

The Raglan, opened in December 2015, and delivers further state-of-the-art facilities and is home to Orwell’s rehabilitation units. Rooms, both single and double, have stunning views of either the Dublin mountains or our communal landscaped gardens. Like The Elgin each unit has its own kitchen and lounge area to provide a comfortable and homely feel for both residents and visitors.

Our buildings are connected via ‘The Avenue’ and ‘Wellness@Orwell’, the heart of our community. Here our residents can have the ‘weekly do’ in our hair salon, a pedicure or massage in one of our sensory therapy rooms, a coffee or lunch with friends or family
in ‘The Clyde’, pop into our shop, or just catch up on the news with their fellow residents. At Orwell Private we believe that the atmosphere and ambience we create is just as important to you as the medical care we provide.

ORWELL HOME CARE

Orwell Home Care allows individuals in the wider community to retain their independence and self-reliance with support from our home care team.

Our home care division is based on the same principles of governance that apply right throughout our organisation. We aim to be highly responsive in our approach to the services we provide and will design an individual care plan which is tailor-made specifically for you. Services are available 365 days a year from one hour per day to 24 hour care and include: personal care - home help - social care and companionship - live-in care - respite care - convalescent care - dementia care - personal assistants.
Recuperate in style and luxury in the recently opened Elgin Convalescence at Orwell Private. Take the stress and worry out of your recovery and let our professional team take care of your needs after an illness or period of time in hospital.

It is the little things that make a difference at Orwell and this is evident throughout our 13 bed unit. Not only do we provide everything to meet your medical and care needs but the unit houses a tastefully designed library and lounge delivering that home from home feel. For clients who are well enough there is access to our gardens and, of course, all the facilities which are available at Orwell Private including our rehabilitation gym, subject to assessment.

And just because you’re not at home, you should not have to make any concessions in terms of enjoying the food you love. Our internationally renowned chef is constantly updating our menus, prepared in our state of the art kitchen and using fresh ingredients from our kitchen garden. You can choose to dine at a table in your room, in our dining room or restaurant, or in bed - depending on how well you’re feeling.

Maximum stay at The Elgin Convalescence is two weeks with a private physiotherapy session per week included in your stay if required on assessment.
At Orwell Healthcare, we believe we have a responsibility to our broader communities to share our wealth of knowledge in both the nursing and home care settings. As with everything we do we lead by example and offer in-house and external on-going training through Orwell Education.

Orwell Education helps develop an improved understanding of care among healthcare professionals and those caring for a loved one. Our courses include physical handling - food hygiene - CPR - dementia training - infection control.
